Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Draft a source contract for rainfall stations.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

State the key and grain for monthly facility reporting.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Explain why a successful join may still be invalid.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 4

Define a retention schedule for a linked analytical table.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Include station entity, identifier, coordinates/version, variable/unit, observation time, authority, calibration, update cycle, access, retention, and quality owner.

Solution 2

A candidate key is facility identifier + reporting month, subject to the declared service/disaggregation grain.

Solution 3

Keys can match while concepts, periods, populations, authority, or quality are incompatible.

Solution 4

State purpose, lawful basis, approved users, active duration, review date, deletion/archive rule, and evidence of disposal.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
