

EXECUTIVE BRIEF

From Signal to Accountable Action

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C05
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Convert analytical signals into capacity-aware, reviewable, monitored, and retireable decision products.

Why it matters

An unreviewable queue or unexplained dashboard score creates operational noise and can shift authority silently to the model.

Illustrative application

Repeated alerts update one governed case with acknowledgement, escalation, resolution, and expiry times rather than creating alert fatigue.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
