Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Add alert expiry and acknowledgement.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Define an override review.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Distinguish monitoring from impact evaluation.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 4

Draft a retirement record.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Store created, acknowledged, resolved, and expiry times with escalation on missed service levels.

Solution 2

Review rates, reasons, outcomes, users, sectors/groups, and whether rules or training need change.

Solution 3

Monitoring checks operation and model behaviour; impact evaluation estimates whether the service caused better outcomes.

Solution 4

Record reason, authority, effective date, affected users, replacement, data/model disposition, retained evidence, and communications.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
