

EXERCISES AND EXACT SOLUTIONS

V7_A_N01 - Operate the Agricultural Intelligence Platform

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C06
Notebook	V7_A_N01
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Add recovery-point checks.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Separate technical success from statistical acceptance.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Design a release rollback.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Compare the last verified backup and replicated checkpoint with the approved recovery-point objective.

Solution 2

Technical success means the workflow ran; statistical acceptance requires validated concepts, estimates, uncertainty, confidentiality, and authority.

Solution 3

Preserve the prior release, immutable inputs, code version, approvals, rollback owner, trigger, and post-incident review.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
