

CANONICAL LESSON

Ingest Once, Preserve the Evidence

Decision-centred foundations for accountable sector intelligence

Production Unit	PU-B07-C07
Notebook	V7_A_N02
Status	Controlled educational draft v0.1
Data boundary	Synthetic instructional data only

Central decision: Create a traceable agricultural evidence layer that preserves source meaning, provenance, units, time, geography, and lawful use through ingestion.

Learning outcomes

Why this matters

Convenient pipelines can erase provenance or change meaning, leaving downstream agricultural decisions impossible to audit.

The analytical workflow is useful only when evidence, uncertainty, authority, and action are connected explicitly. The model supports professional judgement; it does not replace accountable institutional authority.

Worked cross-sector example

A rainfall observation retains station identity, coordinate version, unit, timestamp, calibration state, and source checksum after ingestion.

Boundary: The example supports learning and review. It does not constitute an official statistic, eligibility determination, enforcement action, clinical judgement, or operational authorization.

Practice and reflection

- 1.
- Add schema validation.
- 2.
- Design correction lineage.
- 3.

- Explain why accepted is not published.

Answer key

- 1.
- Validate names, types, ranges, keys, units, and version before bronze storage.
- 2.
- Preserve immutable originals and link each replacement to its predecessor, reason, authorizer, and timestamp.
- 3.
- Acceptance only confirms intake controls; statistical validation, confidentiality, approval, and release remain pending.

Operational readiness checklist

- Purpose and decision owner are named.
- Evidence definitions, provenance, and lawful access are documented.
- Uncertainty and abstention are visible.
- Human review, escalation, monitoring, incident response, and retirement are assigned.
- Equity, accessibility, security, and sector-specific approval are complete.
