

EXERCISES AND EXACT SOLUTIONS

Quality Before Yield

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C08
Notebook	V7_A_N03
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Add duplicate detection.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Explain edit versus imputation.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Design correction lineage.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Use stable record keys plus content hashes and fieldwork metadata.

Solution 2

An edit corrects with evidence; imputation estimates a missing value and must retain flags and uncertainty.

Solution 3

Preserve original, corrected value, rule, reason, editor, approver, timestamp, and version.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
