

EXECUTIVE BRIEF

V7_A_N05 - The Agricultural Decision Room

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C10
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Design an agricultural decision room that converts evidence into capacity-aware briefs, referrals, actions, monitoring, and documented closure.

Why it matters

Dashboards without workflow can amplify alerts while obscuring who reviews, acts, escalates, resolves, or retires a case.

Illustrative application

A drought signal enters a review queue with evidence, uncertainty, owner, response capacity, escalation time, and expiry criteria.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
