

EXECUTIVE BRIEF

Market Prices With Context

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C12
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Interpret agricultural market prices with product, grade, unit, market, season, transaction context, and policy-relevant uncertainty intact.

Why it matters

Price comparisons can be false when grades, units, transaction levels, seasons, or market access conditions differ.

Illustrative application

A maize price alert distinguishes wholesale from retail prices and standardizes package units before comparing markets.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
