

EXERCISES AND EXACT SOLUTIONS

Market Prices With Context

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C12
Notebook	V7_A_N07
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Add wholesale and farmgate series without mixing levels.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Harmonize a 100-kg sack to kilograms.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Compare nominal and real alerts.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 4

Explain why price weights cannot become budget shares automatically.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Preserve transaction level and compare within compatible panels.

Solution 2

Divide the sack price by 100 only after validating net weight and grade.

Solution 3

Deflate with a documented index and report both interpretations.

Solution 4

Prices do not encode objectives, needs, distribution, externalities, constraints, uncertainty, or legal authority.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
