

EXERCISES AND EXACT SOLUTIONS

Earlier Signals, Safer Escalation

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C14
Notebook	V7_A_N09
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Add conflict/access constraints.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Explain why indicators should not be averaged blindly.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Design an escalation protocol.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Add a dated, sourced accessibility field and abstain where observation is unsafe.

Solution 2

Scales and meanings differ; aggregation requires explicit normalization, weights, and sensitivity.

Solution 3

Specify verification owner, deadline, corroboration, action authority, communication, and closure criteria.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
