

EXECUTIVE BRIEF

Agricultural Census and Frame Intelligence

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C16
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Govern agricultural census and frame intelligence through explicit units, coverage rules, update cycles, duplication controls, and traceable frame maintenance.

Why it matters

A frame can look complete while omitting new farms, duplicating holdings, or confusing households, parcels, and enterprises.

Illustrative application

A farm frame separates households, holdings, parcels, and establishments while recording births, deaths, splits, merges, and coverage gaps.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
