

EXERCISES AND EXACT SOLUTIONS

Count Herds, Understand Systems

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C18
Notebook	V7_A_N13
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Add seasonal mobility.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Distinguish animals from livestock units.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Explain the disease-control boundary.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Use route/season calendars and double-count controls agreed with pastoral communities.

Solution 2

Headcounts describe animals; livestock units standardize approximate resource demand using explicit factors.

Solution 3

Surveillance signals require veterinary confirmation, law, risk assessment, proportionality, communication, and compensation safeguards.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
