

EXERCISES AND EXACT SOLUTIONS

Food Security Is More Than Food Supply

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C19
Notebook	V7_A_N14
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Add survey confidence intervals.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Explain the four dimensions.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Define the classification boundary.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Use weights, clustering, stratification, and replicate/Taylor variance as designed.

Solution 2

Availability concerns supply; access concerns resources; utilization concerns diet/health; stability concerns persistence and shocks.

Solution 3

Any formal phase classification follows the competent framework, evidence convergence, expert protocols, documentation, and governance—not this index alone.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
