

EXECUTIVE BRIEF

V7_A_N15 - National Agricultural Intelligence Capstone

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C20
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Integrate governed agricultural evidence, forecasts, risks, referrals, capacity, and monitoring into one accountable national decision product.

Why it matters

A capstone system can become a polished dashboard without accountability unless evidence and decision workflows remain connected.

Illustrative application

A national decision brief links census frames, survey estimates, forecasts, market signals, drought evidence, uncertainty, and action owners.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
