

CANONICAL LESSON

V7_A_N15 - National Agricultural Intelligence Capstone

Decision-centred foundations for accountable sector intelligence

Production Unit	PU-B07-C20
Notebook	V7_A_N15
Status	Controlled educational draft v0.1
Data boundary	Synthetic instructional data only

Central decision: Integrate governed agricultural evidence, forecasts, risks, referrals, capacity, and monitoring into one accountable national decision product.

Learning outcomes

Why this matters

A capstone system can become a polished dashboard without accountability unless evidence and decision workflows remain connected.

The analytical workflow is useful only when evidence, uncertainty, authority, and action are connected explicitly. The model supports professional judgement; it does not replace accountable institutional authority.

Worked cross-sector example

A national decision brief links census frames, survey estimates, forecasts, market signals, drought evidence, uncertainty, and action owners.

Boundary: The example supports learning and review. It does not constitute an official statistic, eligibility determination, enforcement action, clinical judgement, or operational authorization.

Practice and reflection

- 1.
- Defend the release gate.
- 2.

- Trace one headline to source records.
- 3.
- Conduct an oral challenge on a false alarm.

Answer key

- 1.
- Release requires data, statistical, sector, confidentiality, governance, and named-authority acceptance.
- 2.
- Follow indicator metadata, transformations, weights, model version, interval, review record, and release version.
- 3.
- Compare avoided harm, response burden, threshold alternatives, missed-event costs, and the post-event learning record.

Operational readiness checklist

- Purpose and decision owner are named.
- Evidence definitions, provenance, and lawful access are documented.
- Uncertainty and abstention are visible.
- Human review, escalation, monitoring, incident response, and retirement are assigned.
- Equity, accessibility, security, and sector-specific approval are complete.
