

EXECUTIVE BRIEF

Beds, Staff, Supplies: Forecasting Service Capacity

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C22
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Forecast beds, staff, medicines, and service demand with time-aware baselines, uncertainty, constraints, and operational ownership.

Why it matters

Nominal bed counts can conceal unavailable staff, supplies, equipment, or referral capacity.

Illustrative application

A facility forecast links expected admissions to staffed beds, shift coverage, oxygen, and supply availability.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
