

## EXERCISES AND EXACT SOLUTIONS

# Maternal and Child Health: Support, Not Scoring

---

Independent practice, facilitated discussion, and assessment reference

|                            |                                                 |
|----------------------------|-------------------------------------------------|
| <b>Production Unit</b>     | PU-B07-C23                                      |
| <b>Notebook</b>            | V7_B_N03                                        |
| <b>Version</b>             | 0.1                                             |
| <b>Assessment boundary</b> | Learning evidence—not operational authorization |

## Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

### Exercise 1

Add uncertainty for small denominators.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

### Exercise 2

Protect privacy.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

### Exercise 3

Separate access from quality.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

## Exact solutions and scoring guide

### Solution 1

Use interval estimates and suppress/aggregate unstable cells.

### Solution 2

Minimize fields, control access, aggregate geography, audit disclosure, and prohibit individual re-identification.

### Solution 3

Distance/utilization describe access; guideline adherence, outcomes, experience, and safety describe quality.

## Scoring rubric

| Criterion        | Strong evidence                              | Revision required                     |
|------------------|----------------------------------------------|---------------------------------------|
| Decision framing | Owner, action, horizon, authority named      | Model output substituted for decision |
| Evidence         | Concepts, grain, provenance, limits explicit | Data treated as self-explanatory      |
| Uncertainty      | Abstention/escalation used appropriately     | False precision or hidden limitations |
| Governance       | Human authority and safeguards retained      | Authority silently delegated          |
