

EXECUTIVE BRIEF

Nutrition Evidence With Dignity

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C29
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Produce nutrition intelligence with valid measures, reference standards, uncertainty, privacy, dignity, and authorized care pathways.

Why it matters

Poorly governed nutrition scoring can stigmatize people, expose sensitive information, or replace professional assessment.

Illustrative application

A nutrition signal supports confidential outreach and clinical assessment without labeling a child or household.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
