

## CANONICAL LESSON

# Quality of Care Is Not Activity Alone

Decision-centred foundations for accountable sector intelligence

|                 |                                   |
|-----------------|-----------------------------------|
| Production Unit | PU-B07-C31                        |
| Notebook        | V7_B_N11                          |
| Status          | Controlled educational draft v0.1 |
| Data boundary   | Synthetic instructional data only |

**Central decision:** Measure quality of care through outcomes, safety, experience, equity, continuity, and clinical standards—not activity alone.

## Learning outcomes

### Why this matters

High activity can coexist with unsafe, inequitable, ineffective, or fragmented care.

The analytical workflow is useful only when evidence, uncertainty, authority, and action are connected explicitly. The model supports professional judgement; it does not replace accountable institutional authority.

### Worked cross-sector example

A facility combines service volume with outcomes, adverse events, continuity, and patient experience.

**Boundary:** The example supports learning and review. It does not constitute an official statistic, eligibility determination, enforcement action, clinical judgement, or operational authorization.

## Practice and reflection

- 1.
- Critique the adjustment.
- 2.
- Add control limits.
- 3.
- Explain non-punitive review.

## Answer key

- 1.
- Dividing by case mix is only pedagogical; operational adjustment needs validated covariates, specification, calibration, fairness, and audit.
- 2.
- Use binomial/appropriate uncertainty and expected-versus-observed limits.
- 3.
- Signals initiate record review, learning, and system improvement with due process—not automatic blame.

## Operational readiness checklist

- Purpose and decision owner are named.
- Evidence definitions, provenance, and lawful access are documented.
- Uncertainty and abstention are visible.
- Human review, escalation, monitoring, incident response, and retirement are assigned.
- Equity, accessibility, security, and sector-specific approval are complete.
