

EXERCISES AND EXACT SOLUTIONS

V7_B_N14 - Evaluate What Changed in Health

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C34
Notebook	V7_B_N14
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

State the identifying assumption.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Test differential attrition.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Separate impact and implementation failure.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

For difference-in-differences, untreated potential outcomes must follow comparable trends absent the programme.

Solution 2

Compare attrition by group and baseline risk and bound missing outcomes.

Solution 3

A null effect with low fidelity differs from a well-implemented ineffective intervention and calls for a different decision.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
