

EXECUTIVE BRIEF

Teachers Where Learners Need Them

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C37
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Plan teacher deployment using enrolment, workload, subject needs, geography, equity, feasibility, and transparent institutional authority.

Why it matters

Mechanical allocation can deepen inequity, ignore local constraints, and treat teachers as interchangeable units.

Illustrative application

A district compares learner demand and subject shortages before proposing feasible teacher reallocation.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
