

EXECUTIVE BRIEF

Learning Gaps to Proportionate Support

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C38
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Translate learning-assessment evidence into proportionate support without labeling learners, overstating precision, or replacing professional judgement.

Why it matters

Scores alone can misclassify learners and turn formative support into exclusion or tracking.

Illustrative application

Teachers combine assessment patterns with classroom evidence to select and monitor a targeted support strategy.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
