

CANONICAL LESSON

Put Learning Inputs Where They Can Be Used

Decision-centred foundations for accountable sector intelligence

Production Unit	PU-B07-C40
Notebook	V7_C_N05
Status	Controlled educational draft v0.1
Data boundary	Synthetic instructional data only

Central decision: Allocate textbooks and learning inputs using verified demand, curriculum fit, delivery capacity, utilization, equity, and auditable follow-through.

Learning outcomes

Why this matters

Procurement counts can appear successful while materials remain mismatched, delayed, inaccessible, or unused.

The analytical workflow is useful only when evidence, uncertainty, authority, and action are connected explicitly. The model supports professional judgement; it does not replace accountable institutional authority.

Worked cross-sector example

A district reconciles enrolment, stock, curriculum, and delivery evidence before authorizing redistribution.

Boundary: The example supports learning and review. It does not constitute an official statistic, eligibility determination, enforcement action, clinical judgement, or operational authorization.

Practice and reflection

- 1.
- Add language/grade titles.
- 2.

- Add pipeline orders.
- 3.
- Audit equity after delivery.

Answer key

- 1.
- Allocate only within compatible title-language-grade-edition cells.
- 2.
- Subtract confirmed usable pipeline with arrival uncertainty.
- 3.
- Compare requested, allocated, dispatched, received, usable, and learner-access ratios by geography and relevant groups.

Operational readiness checklist

- Purpose and decision owner are named.
- Evidence definitions, provenance, and lawful access are documented.
- Uncertainty and abstention are visible.
- Human review, escalation, monitoring, incident response, and retirement are assigned.
- Equity, accessibility, security, and sector-specific approval are complete.
