

EXERCISES AND EXACT SOLUTIONS

Equity Is a Distribution, Not an Average

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C42
Notebook	V7_C_N07
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Add survey weights.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Compare parity and level.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Protect intersectional cells.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Estimate with design weights and design-consistent variance.

Solution 2

Parity can coexist with equally poor outcomes; report both group ratios and absolute levels.

Solution 3

Apply minimum counts, controlled aggregation, secure access, purpose limitation, and community-sensitive interpretation.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
