

CANONICAL LESSON

From School to Work Without Chasing Yesterday

Decision-centred foundations for accountable sector intelligence

Production Unit	PU-B07-C43
Notebook	V7_C_N08
Status	Controlled educational draft v0.1
Data boundary	Synthetic instructional data only

Central decision: Align school-to-work intelligence with changing labour demand, transferable skills, transition evidence, uncertainty, and accountable education and labour institutions.

Learning outcomes

Why this matters

Training against yesterday’s vacancies can lock learners into obsolete pathways and overstate the certainty of labour-market forecasts.

The analytical workflow is useful only when evidence, uncertainty, authority, and action are connected explicitly. The model supports professional judgement; it does not replace accountable institutional authority.

Worked cross-sector example

A transition review combines graduate outcomes, employer evidence, occupation change, and programme capacity before recommending adaptation.

Boundary: The example supports learning and review. It does not constitute an official statistic, eligibility determination, enforcement action, clinical judgement, or operational authorization.

Practice and reflection

- 1.
- Add occupation crosswalks.
- 2.

- Explain vacancy bias.
- 3.
- Design employer validation.

Answer key

- 1.
- Version national/ISCO/ISCED mappings and allow many-to-many links.
- 2.
- Online/formal vacancies underrepresent informal, internal, rural, and unadvertised demand.
- 3.
- Combine structured employer surveys, tracer studies, administrative data, sector councils, and documented qualitative review.

Operational readiness checklist

- Purpose and decision owner are named.
- Evidence definitions, provenance, and lawful access are documented.
- Uncertainty and abstention are visible.
- Human review, escalation, monitoring, incident response, and retirement are assigned.
- Equity, accessibility, security, and sector-specific approval are complete.
