

EXECUTIVE BRIEF

Inclusion Begins by Seeing Barriers

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C44
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Identify and remove barriers to education using accessible evidence, lived experience, reasonable accommodation, referral pathways, and accountable human review.

Why it matters

Deficit-based classification can stigmatize learners, expose sensitive information, and substitute labels for removal of institutional barriers.

Illustrative application

A school combines accessibility review, learner and caregiver input, and service capacity before agreeing a support plan.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
