

CANONICAL LESSON

Inclusion Begins by Seeing Barriers

Decision-centred foundations for accountable sector intelligence

Production Unit	PU-B07-C44
Notebook	V7_C_N09
Status	Controlled educational draft v0.1
Data boundary	Synthetic instructional data only

Central decision: Identify and remove barriers to education using accessible evidence, lived experience, reasonable accommodation, referral pathways, and accountable human review.

Learning outcomes

Why this matters

Deficit-based classification can stigmatize learners, expose sensitive information, and substitute labels for removal of institutional barriers.

The analytical workflow is useful only when evidence, uncertainty, authority, and action are connected explicitly. The model supports professional judgement; it does not replace accountable institutional authority.

Worked cross-sector example

A school combines accessibility review, learner and caregiver input, and service capacity before agreeing a support plan.

Boundary: The example supports learning and review. It does not constitute an official statistic, eligibility determination, enforcement action, clinical judgement, or operational authorization.

Practice and reflection

- 1.
- Explain under-identification.
- 2.
- Add universal-design indicators.
- 3.

- Define safeguarding.

Answer key

- 1.
- Registration depends on screening, stigma, service availability, definitions, and administrative access, so it is not prevalence.
- 2.
- Measure physical, communication, curricular, digital, transport, sanitation, and assessment accessibility.
- 3.
- Use consent, minimization, restricted access, non-discrimination, referral protocols, grievance channels, and no automated individual decisions.

Operational readiness checklist

- Purpose and decision owner are named.
- Evidence definitions, provenance, and lawful access are documented.
- Uncertainty and abstention are visible.
- Human review, escalation, monitoring, incident response, and retirement are assigned.
- Equity, accessibility, security, and sector-specific approval are complete.
