

EXECUTIVE BRIEF

Keep Learning Going When Hazards Arrive

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C45
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Protect learning continuity by combining hazard, exposure, vulnerability, accessibility, preparedness, response capacity, uncertainty, and authorized action.

Why it matters

Hazard alerts without exposure, capacity, or authority can cause unnecessary closure, unequal disruption, or delayed protective action.

Illustrative application

A district tests heat, flood, access, and continuity scenarios before activating a proportionate school-safety plan.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
