

EXERCISES AND EXACT SOLUTIONS

Anomaly Is Not Guilt

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C46
Notebook	V7_C_N11
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Control multiple testing.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Explain similarity limits.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Design due process.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Pre-specify tests and use false-discovery or family-wise controls with validation.

Solution 2

Similarity can reflect teaching, curriculum, chance, form structure, or accommodations; it is not proof of collusion.

Solution 3

Restrict access, preserve evidence, notify fairly, allow response/appeal, require independent human review, and separate analytics from sanction authority.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
