

EXERCISES AND EXACT SOLUTIONS

Housing Need Beyond Counts

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C51
Notebook	V7_D_N01
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Add overcrowding and dwelling-quality indicators.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Model supply completion.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Compare area and household measures.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 4

Explain why vacancy does not imply immediately usable housing.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Define occupancy norm and quality dimensions with survey uncertainty.

Solution 2

Use permits, starts, completion probabilities, delays, demolitions, and conversions.

Solution 3

Area averages describe places; household distributions describe people and may reveal inequality hidden by averages.

Solution 4

Vacant units may be seasonal, uninhabitable, mismatched, speculative, legally unavailable, or unaffordable.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
