

EXECUTIVE BRIEF

See the Service Gaps: Informal-Settlement Mapping

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C53
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Map service gaps in informal settlements using accessible, privacy-preserving, participatory evidence that supports equitable investment without exposing or stigmatizing residents.

Why it matters

High-resolution maps can expose vulnerable households, reinforce stigma, or become instruments of eviction rather than service improvement.

Illustrative application

Residents and service agencies validate aggregated water, sanitation, access, drainage, and waste gaps before prioritization.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
