

EXECUTIVE BRIEF

Access Means Reaching Opportunity Reliably

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C57
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Measure mobility by reliable access to opportunities across time, cost, safety, disability, gender, geography, service variability, and uncertainty—not distance alone.

Why it matters

Average travel time can hide unreliable service, inaccessible routes, unsafe transfers, and unequal opportunity.

Illustrative application

A city compares actual travel reliability and affordability to jobs, schools, health care, and markets across neighbourhoods.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
