

EXECUTIVE BRIEF

Land Signals With Due Process

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C58
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Use land and tenure signals only to support authorized review with provenance, confidence, competing claims, privacy, notice, appeal, and due process.

Why it matters

Automated matching or imagery can create false certainty, expose claimants, and trigger dispossession without lawful review.

Illustrative application

A land agency reviews multiple records and claimant evidence before referring a disputed parcel for lawful adjudication.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
