

EXECUTIVE BRIEF

Measure Exposure, Do Not Blame Communities

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C59
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Measure environmental exposure and service conditions without blaming communities, while preserving source attribution, uncertainty, equity, privacy, participation, and accountable remediation.

Why it matters

Area-level exposure evidence can stigmatize residents or shift responsibility away from polluters and service authorities.

Illustrative application

A settlement exposure profile separates pollution sources, pathways, population vulnerability, and municipal service gaps.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
