

EXERCISES AND EXACT SOLUTIONS

Measure Exposure, Do Not Blame Communities

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C59
Notebook	V7_D_N09
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Add calibration uncertainty.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Separate hazard and vulnerability.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Prevent stigmatization.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Propagate sensor/model error and compare calibrated/uncalibrated scenarios.

Solution 2

Hazard is the physical event/exposure; vulnerability and coping capacity shape consequences.

Solution 3

Use neutral area-level language, participation, disclosure protection, structural explanations, benefit-oriented interventions, and no punitive or displacement use.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
