

## EXERCISES AND EXACT SOLUTIONS

# Coordinate Support Without Scoring Human Worth

---

Independent practice, facilitated discussion, and assessment reference

|                            |                                                 |
|----------------------------|-------------------------------------------------|
| <b>Production Unit</b>     | PU-B07-C61                                      |
| <b>Notebook</b>            | V7_D_N11                                        |
| <b>Version</b>             | 0.1                                             |
| <b>Assessment boundary</b> | Learning evidence—not operational authorization |

## Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

### Exercise 1

Estimate unmet need cautiously.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

### Exercise 2

Protect locations.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

### Exercise 3

Explain why vulnerability scores are dangerous.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

## Exact solutions and scoring guide

### Solution 1

Triangulate service, outreach, count, survey, and administrative sources with overlap and uncertainty; do not equate clients with population.

### Solution 2

Aggregate geography, separate identifiers, restrict access, minimize retention, and manage consent/safety.

### Solution 3

Scores embed contested values and biased access data and can deny rights; use needs-led human assessment, appeal, and universal safeguards.

## Scoring rubric

| Criterion        | Strong evidence                              | Revision required                     |
|------------------|----------------------------------------------|---------------------------------------|
| Decision framing | Owner, action, horizon, authority named      | Model output substituted for decision |
| Evidence         | Concepts, grain, provenance, limits explicit | Data treated as self-explanatory      |
| Uncertainty      | Abstention/escalation used appropriately     | False precision or hidden limitations |
| Governance       | Human authority and safeguards retained      | Authority silently delegated          |
