

CANONICAL LESSON

Coordinate Support Without Scoring Human Worth

Decision-centred foundations for accountable sector intelligence

Production Unit	PU-B07-C61
Notebook	V7_D_N11
Status	Controlled educational draft v0.1
Data boundary	Synthetic instructional data only

Central decision: Coordinate homelessness and housing support through needs, preferences, urgency, eligibility, service capacity, consent, privacy, referral, and accountable casework—never a score of human worth.

Learning outcomes

Why this matters

Opaque prioritization can dehumanize people, encode discrimination, expose sensitive histories, and deny support without explanation or appeal.

The analytical workflow is useful only when evidence, uncertainty, authority, and action are connected explicitly. The model supports professional judgement; it does not replace accountable institutional authority.

Worked cross-sector example

A multidisciplinary team uses a transparent needs review to offer options and track referrals without ranking people's value.

Boundary: The example supports learning and review. It does not constitute an official statistic, eligibility determination, enforcement action, clinical judgement, or operational authorization.

Practice and reflection

- 1.
- Estimate unmet need cautiously.

- 2.
- Protect locations.
- 3.
- Explain why vulnerability scores are dangerous.

Answer key

- 1.
- Triangulate service, outreach, count, survey, and administrative sources with overlap and uncertainty; do not equate clients with population.
- 2.
- Aggregate geography, separate identifiers, restrict access, minimize retention, and manage consent/safety.
- 3.
- Scores embed contested values and biased access data and can deny rights; use needs-led human assessment, appeal, and universal safeguards.

Operational readiness checklist

- Purpose and decision owner are named.
- Evidence definitions, provenance, and lawful access are documented.
- Uncertainty and abstention are visible.
- Human review, escalation, monitoring, incident response, and retirement are assigned.
- Equity, accessibility, security, and sector-specific approval are complete.
