

EXECUTIVE BRIEF

Census, Address, and Geospatial Frames

What leaders should authorize, require, and refuse

Production Unit	PU-B07-C62
Decision status	Controlled learning asset
Audience	Executives, programme owners, statisticians, technical leads
Data	Synthetic examples only

Executive takeaway: Build census, address, and geospatial frames with explicit coverage, currency, uniqueness, linkage quality, uncertainty, privacy, field verification, and controlled operational use.

Why it matters

Incomplete or duplicated frames can omit populations, distort allocation, expose households, and create false confidence in geographic coverage.

Illustrative application

A statistical office reconciles address, building, imagery, and enumeration evidence before updating a census frame.

Minimum approval conditions

- Named accountable owner and lawful purpose
- Defined evidence, provenance, reference period, population, and geography
- Decision-relevant validation and visible uncertainty
- Documented abstention, referral, override, and incident processes
- Accessibility, equity, security, retention, and retirement review

Non-negotiable boundary

The analytical system may inform review. It may not independently authorize benefits, sanctions, enforcement, clinical treatment, school exclusion, displacement, or another consequential action.
