

EXERCISES AND EXACT SOLUTIONS

Census, Address, and Geospatial Frames

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C62
Notebook	V7_D_N12
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Diagnose duplicate addresses.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Separate building and dwelling.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Design a safe field-verification queue.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Normalize components but preserve originals; combine spatial, name, and occupancy evidence with human review.

Solution 2

One building can contain many dwellings and households; identifiers and counts must respect each level.

Solution 3

Minimize sensitive attributes, use reason codes and safe routes, log corrections, and prohibit enforcement reuse.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
