

EXERCISES AND EXACT SOLUTIONS

National Habitat Intelligence Capstone

Independent practice, facilitated discussion, and assessment reference

Production Unit	PU-B07-C65
Notebook	V7_D_N15
Version	0.1
Assessment boundary	Learning evidence—not operational authorization

Instructions

Complete Part A before consulting the solutions. State assumptions explicitly. Where evidence is insufficient, write an abstention or escalation response rather than inventing precision.

Exercise 1

Design a non-punitive service-gap queue.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 2

Combine hazard and shelter capacity.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exercise 3

Audit displacement in an upgrading programme.

- Required output: a concise decision-ready response with owner, evidence, uncertainty, and boundary where applicable.

Exact solutions and scoring guide

Solution 1

Aggregate need, verify with communities, separate service planning from land enforcement, protect tenure and locations, and provide correction.

Solution 2

Keep hazard, exposure, vulnerability, accessibility, travel, occupancy, and verified capacity distinct.

Solution 3

Track rents, evictions, tenure, mobility, business turnover, service access, participation, and spillovers across affected groups.

Scoring rubric

Criterion	Strong evidence	Revision required
Decision framing	Owner, action, horizon, authority named	Model output substituted for decision
Evidence	Concepts, grain, provenance, limits explicit	Data treated as self-explanatory
Uncertainty	Abstention/escalation used appropriately	False precision or hidden limitations
Governance	Human authority and safeguards retained	Authority silently delegated
